

AME Metropolitan Church

Hartford, Connecticut

Internet Expansion across North Main Street

Project Summary: Problem was high Speed COMCAST Internet unavailable across North Main Street for the Church. Low speed DSL not able to support video streaming. Solution was to install Ubiquiti gigabit nanobeam network to beam high speed internet across street from Parish Center to the Church. Now secure high speed internet and WIFI is available in the church to Live Stream Church Mass and Events. Completed August 2021

Panoramic WIFI now available inside the church!
